RE: RFP 2019-01-22  
ITEM: Automatic Passenger Counters (APC)  
RFB: Closes: February 22, 2019 4:00 PM MDT

## ADDENDUM #4

### Questions

Addendum #4 for Valley Ride/Valley Regional Transit Request for Proposal (RFP 2019-01-22 Automatic Passenger Counters) is hereby made part of the project requirements and contract documents for the referenced project. Please note, failure to acknowledge this Addendum does not relieve you from fulfilling the Addendum requirements.

#### Questions:

1. In the Scope of Work it states, "The APC system will leverage existing systems when possible rather than implementing systems that result in duplicate functionality, unless redundant systems improve system reliability" That said, is the cities preference to retain Route Match as their current CAD/AVL provider or is the city interested in seeing proposals that not only include APC's, but also include a CAD/AVL system to replace Route Match?

VRT will retain our existing CAD/AVL, but understand that it may not be ideal for all APC systems to utilize and so such are leaving the option open to the vendor add their AVL Solution as part of the proposal in the event that it would improve reliability of APC data.

2. Please list the make, and model of the Vehicle Logic Unit currently used in your buses.

Make: MobiLinq

Model: 360-2702-101

We wanted to clarify a couple questions that were on some previous addendums:

Addendum 2 Question 16:

Does VRT currently have wireless LAN at your depot? If so, how many access points and what WLAN technology is used: i.e. 802.11 a or b or g or n?

Wireless is availability at the facilities, but does not extend to the yard were buses are parked when not in use. Current Access Points Support 802.11 a/b/g/n/ac.

Addendum 3 Question 8:

1. Are there any restrictions with transferring APC data from the bus via the on-board Cradlepoint Wireless Modems instead of WLAN at the garage or other cellular service on board the bus?

There are no-restrictions transferring data via the on-board Cradlepoint other than bandwidth available from the cellular tower.

There are no other changes at this time.

Sincerely,

Coreen Smith
